

# Project Title

Jayme Woogerd, ...

## 1 Introduction

This first section introduces the problem and outlines some previous work. Here is how you cite a work: researchers such as Cleveland and McGill [?] emphasized readability and accuracy.

## 2 One-sentence description

A one-sentence description of the project

## 3 Project Type

Experimental Study (In-Person) + Experimental Study (Online) + Statistics  
(Unsure what else goes here...)

## 4 Audience

*Who is the audience for this project? How does it meet their needs? What happens if their needs remain unmet?*

Who's going to read this paper?

## 5 Approach

*What is your approach and why do you think it's cool and will be successful?*

List the techniques of the project e.g. The three steps of the project are:

1. First technique/approach
2. Second technique/approach

## 6 Best-case Impact Statement

*In the best-case scenario, what would be the impact statement (conclusion statement) for this project?*

What are we looking to achieve? What's the conclusion?

## 7 Major Milestones

1. A major milestone
2. Another major milestone

## 8 Obstacles

### 8.1 Major obstacles

There are a few "deal-breakers" for this project.

1. One major obstacle
2. Another major obstacle

### 8.2 Minor obstacles

1. One minor obstacle
2. Another minor obstacle

## 9 Resources Needed

*What additional resources do you need to complete this project?*

## 10 5 Related Publications

*List 5 major publications that are most relevant to this project, and how they are related.*

1. One relevant source
2. Another source

## 11 Define Success

*When / How do you know if you have succeeded in this project?*
